Serving the Critical Hard Chrome Industry

Warning

Improper operation of the plating system and the chemicals used can result in dangerous and hazardous conditions. It is important that all operators be properly trained in these hazards and follow the directives in the various SDS forms. This involves both worker safety and environmental issues. All OSHA and EPA regulations must be followed.

Index	
<u>Chapter</u>	<u>Topic</u>
1	Standard Plating Procedures
2	Reverse Etch and Activation
3	Sulfate Catalyst
4	Chrome Bath Impurities
